

Frugivores and seed dispersal (1986)

Edited by Estrada, A. & Fleming, T.H.,
Dr W. Junk Publishers, Dordrecht, The Netherlands.

Part 1 : Plant strategies

Introduction

1. Herrera, C. M. Vertebrate-dispersed plants: why they don't behave the way they should. 5-18.
2. Wheelwright, N. T. A seven-year study of individual variation in fruit production in tropical bird-dispersed tree species in the family Lauraceae. 19-35.
3. Denslow, J. S., T. C. Moermond, and D. J. Levey. Spatial components of fruit display in understory trees and shrubs. 37-44.
4. Stiles, E. W., and D. W. White. Seed deposition patterns: influence of season, nutrients, and vegetation structure. 45-54.
5. Willson, M. F., and W. G. Hoppes. Foliar 'flags' for avian frugivores: signal or serendipity? 55-69.
6. Vázquez-Yanes, C., and A. Orozco-Segovia. Dispersal of seeds by animals: effect on light controlled dormancy in *Cecropia obtusifolia*. 71-77.

Part 2: Frugivores strategies

Introduction

7. Janson, C. H., E. W. Stiles, and D. W. White. Selection of plant fruiting traits by brown capuchin monkeys: a multivariate approach. 83-92
8. Estrada, A., and R. Coates-Estrada 1986. Frugivory by howling monkeys (*Alouatta palliata*) at Los Tuxtlas, Mexico: dispersal and fate of seeds. 93-104.
9. Fleming, T. H. Opportunism versus specialization: the evolution of feeding strategies in frugivorous bats. 105-118.
10. Charles-Dominique, P. Inter-relations between frugivorous vertebrates and pioneer plants: *Cecropia*, birds and bats in French Guyana. 119-135
11. Moermond, T. C., J. S. Denslow, D. J. Levey, and E. Santana C. The influence of morphology on fruit choice in neotropical birds. 137-146.
12. Levey, D. J. 1986. Methods of seed processing by birds and seed deposition patterns. 147-158.
13. Snow, D. W., and B. K. Snow. Some aspects of avian frugivory in a north temperate area relevant to tropical forest. 159-164.

Part 3 : The consequences of seed dispersal

Introduction

14. Horvitz, C. C., and D. W. Schemske. Seed dispersal and environmental heterogeneity in a neotropical herb: a model of population and patch dynamics. 169-186.
15. Murray, K. G. Consequences of seed dispersal for gap-dependent plants: relationships between seed shadows, germination requirements, and forest dynamics. 187-198.
16. Heithaus, R. E. Seed dispersal mutualism and the population density of *Asarum canadensis*, an ant-dispersed plant. Pages 199-210.
