

# Frugivory and Seed Dispersal: Ecological and Evolutionary Aspects (1993)

Edited by Fleming T.H. and A. Estrada.  
Dordrecht, The Netherlands: Kluwer. Springer

## Part 1: Historical and theoretical aspects of frugivory and seed dispersal

### Introduction

1. Howe, H.F. Specialized and generalized dispersal systems: where does 'the paradigm' stand? 3-13.
2. Eugene W. Schupp. Quantity, quality and the effectiveness of seed dispersal by animals. 15-29.
3. D. L. Venable and J. S. Brown. The population-dynamic functions of seed dispersal. 31-55.
4. F. Gary Stiles and Loreta Rosselli. Consumption of fruits of the Melastomataceae by birds: how diffuse is coevolution? 57-73.
5. Pierre. Charles-Dominique. Speciation and coevolution: an interpretation of frugivory phenomena. 75-84.
6. Pedro Jordano. Geographical ecology and variation of plant-seed disperser interactions: southern Spanish junipers and frugivorous thrushes. 85-104.

## Part 2. Plant strategies

### Introduction

7. Ted. H. Fleming, D. L. Venable and L. G. M. Herrera. 107 Opportunism vs. specialization: the evolution of dispersal strategies in fleshy-fruited plants. 107-120.
8. Carol K. Augspurger and Susan E. Franson. Consequences for seed distributions of intra-crop variation in wing-loading of wind-dispersed species. 121-132.
9. Victoria. L. Sork. Evolutionary ecology of mast-seeding in temperate and tropical oaks (*Quercus* spp.) 133-147.
10. Henry F. Howe. Aspects of variation in a neotropical seed dispersal system. 149-162.
11. Nathaniel T. Wheelwright. Fruit size in a tropical tree species: variation, preference by birds, and heritability 163-174.

## Part 3 : Frugivores strategies

### Introduction

13. Bette A. Loiselle and John G. Blake. Spatial distribution of understory fruit-eating birds and fruiting plants in a neotropical lowland wet forest. 177-189.
14. A. Traveset. Weak interactions between avian and insect frugivores: the case of *Pistacia terebinthus* L. (Anacardiaceae). 191-203.
15. Carlos Martínez del Rio and Carla Restrepo. Ecological and behavioral consequences of digestion in frugivorous animals. 205-216.
16. K. G. Murray, K. Winnett-Murray, E. A. Cromie, M. Minor and E. Meyers. The influence of seed packaging and fruit color on feeding preferences of American robins. 217-226.
17. E. W. Stiles. The influence of pulp lipids on fruit preference by birds. 227-235.
18. Annie Gautier-Hion, Jean-Pierre Gautier and Fiona Maisels. Seed dispersal versus seed predation: an inter-site comparison of two related African monkeys. 237-244.
19. Alejandro Estrada, R. Coates-Estrada, D. Meritt, S. Montiel and D. Curiel. Patterns of frugivore species richness and abundance in forest islands and in agricultural habitats at Los Tuxtlas, Mexico. 245-257.

## Part 4: Consequences of seed dispersal

### Introduction

20. Mary. F. Willson. Dispersal mode, seed shadows, and colonization patterns. 261-280.
21. Jim. L. Hamrick, Darlyne A. Murawski and John D. Nason. The influence of seed dispersal mechanisms on the genetic structure of tropical tree populations. 281-297.
22. Seed rain and advanced regeneration in a tropical rain forest. M. Martinez-Ramos and A. Soto-Castro. 299-318
23. S. Guevara and J. Laborde. Monitoring seed dispersal at isolated standing trees in tropical pastures: consequences for local species availability. 319-338.
24. David L. Gorchoy, Fernando Cornejo, Cesar Ascorra and Margarita Jaramillo. The role of seed dispersal in the natural regeneration of rain forest after strip-cutting in the Peruvian Amazon. 339-349.
25. Carol. C. Horvitz and J. Corff. Spatial scale and dispersion pattern of ant- and bird-dispersed herbs in two tropical lowland rain forests. 351-362.
26. Margaret. M. Byrne and D.J. Levey. Removal of seeds from frugivore defecations by ants in a Costa Rican rain forest. 363-374.
27. John Terborgh, Elizabeth Losos, M.P. Riley and M. Bolaños Riley. Predation by vertebrates and invertebrates on the seeds of five canopy tree species of an Amazonian forest. 375-386.
